

About Chrome Wire Mesh Shelving

Chrome Wire Mesh Shelving consists of just three basic components which can be easily assembled using a soft-faced mallet or similar tool.

The chrome **Upright Posts** are 1800mm tall and 25mm diameter and have grooves every 25mm which are used to adjust the heights of the

The **Shelves** are made from wire mesh with a chrome finish. Mesh shelves help provide dust and dirt free displays. No piles of dust hidden under the

The **Shelves** have conical metal collars that slip over the Upright Posts and allow the height of the shelves to be adjusted

The Upright Posts and the Shelves lock into position with **Plastic Shelf Clips**.

shelves.

The **Plastic Shelf Clips** snap into the grooves of the Upright Post and allow the shelves to be adjusted on 25mm increments.

shelves.

The **Shelves** slide down the **Upright Posts** and over the **Plastic Shelf Clips** to lock the shelves into position.

The **Shelves** feature heavy duty wires with strengthening ribs and reinforced shelf edges.

The **Upright Posts** have threaded levelling feet allowing the **Chrome Wire Shelving** to be set up on uneven floors or you can insert castors.
