

Mobile Solutions for Emergency Performance

Joan Kirner Women's and Children's Hospital

MISSION

To supply Waterloo carts that enhanced emergency response, clinical workflow and infection control across maternity, paediatric and NICU environments.

OUTCOME

Emery supplied a suite of Waterloo carts—with colour-coded configurations, ergonomic layouts and infection-control-ready materials—supporting safer, faster and more efficient care across maternity, paediatrics, theatres and NICU.

SERVICES/SKILLS

Emery provided configuration support, clinical workflow alignment and technical expertise in cart selection, ensuring each unit matched departmental needs, ergonomic considerations and emergency response requirements, while integrating seamlessly into the new facility.

**Cart Configuration · Workflow Alignment
· Clinical Integration · Compliance Ready**

IMPACT

BEFORE	AFTER
Growing demand for maternity and paediatric services	Colour-coded carts for rapid response
Need for fast, clear emergency identification	Improved clinical access and workflow
Requirement for infection-ready mobile equipment	Infection-ready, durable mobile systems

Readiness, hygiene, reliability
